

# Rockfon Mono® Acoustic

Sounds Beautiful

SPACES AS STUNNING AS THEY SOUND.

## **Rockfon Mono<sup>®</sup> Acoustic**

Capture a signature look and brilliant acoustics in a single masterstroke. Rockfon Mono Acoustic opens unlimited possibilities to design awe-inspiring architectural ceilings and walls in any colour. Flat, sloped and curved in any way, you have complete freedom to innovate. Made from recyclable stone wool, Rockfon Mono Acoustic reflects today's design trends with its bold, daring lines and smooth surfaces.

# Create a unique design

Design spaces with beautiful finishes and high sound absorption that make them a pleasure to be in. Rockfon Mono Acoustic has class A sound absorption and meets high fire resistance standards (up to Class A1). The completely seamless system allows for easy integration of light, air conditioning, and ventilation in any design.

# The sound of what's possible

With organic shapes, curves, or bold geometrics, you can capture the spirit of your space or set the mood with your choice of colours. Rockfon Mono Acoustic lets you shape the surfaces of your walls and ceilings to create brilliant architectural designs without compromising on superb acoustics. Feel free to curve the surface of your acoustic panels to as little as a 1500mm radius to fit your building design while achieving a seamless finish.

## Acoustics

Class A sound absorption. Independently tested in certified laboratories using an  $\alpha_w$  measurement in accordance with ISO11654.

## Cradle to Cradle Certified® Silver

## Design
